

PUBLIC NOTICE

PROPOSITION 65

The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the Governor of California to publish a list of chemicals “known to the State to cause cancer or reproductive toxicity.” It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations. The Geysers geothermal field is located in the vicinity of Cobb Mountain that straddles the Sonoma County and Lake County line.

WARNING

Chemicals known to the State of California to cause cancer, birth defects or other reproductive harm are found in geothermal fluids, solids, air emissions as well as chemicals used for facility and geothermal well field operations. Entering and working in this area can expose you to these chemicals. Exposure can occur through air emissions from facility operations or through physical contact with these chemicals. For further information, please contact (707) 431-6198. California Health and Safety Code 25249.6
